

Application Questions

If you are completing your grant application using our online form, you might want to prepare some of your responses in advance of starting. Please note that the following is not a complete list of all questions on the form. You will still need to provide further information about your organisation, those involved in running it and membership information. You will also need to provide information about your organisation's finances, your budget and any permissions required to deliver your project.

However, the following questions require more detailed responses:

- **What does your organisation do?** (aims, key activities/services and beneficiaries)
- **What are you requesting funding for?** You should summarise your project and be specific about what works, equipment or activities the grant would fund.
- **Why is your project needed?**
- **What will the outcomes and benefits be for the community and residents of Blaby District?**
- **How have you taken into account any environmental impacts of your project?**
- **Have you sought and other funding or support your project?** Such as other grant applications, sponsorship from other organisations or businesses, support from local partner organisations, volunteers etc.
- **How will you ensure that your project and organisation will be sustainable beyond the end of this funding?** For example, please explain how you will fund the group/activity in the future or maintain a capital asset.

Please refer to the community grants guidance notes, our FAQs and Top Tips documents that are available on our [Community Grants webpage](#) or from the Funding and Awards Officer at grants@blaby.gov.uk or 0116 272 7566.
